Our Company

Miller™ is about building things that matter. We lead the welding industry in building advanced, solution-focused products and meeting crucial needs for welding safety and health.

We're about the partnership and work. Our Products are designed with our users for manufacturing, fabrication, construction, aviation, motorsports, education, agriculture, and marine applications.

Miller Electric Mfg. LLC, is headquartered in Appleton, Wisconsin, and wholly owned by Illinois Tool Works (NYSE: ITW). The company maintains its industry leadership by setting the standard for reliability, quality, and responsiveness.

This company began with an innovation that responded to customer needs, growing from a one-man operation in 1929, to the world's largest manufacturer of arc welding products. Miller keeps the tradition alive by focusing on its top priority: people.

The Power of Blue®

In 1929, Niles C. Miller recognized the need for a small, affordable arc welder that would operate on the type of electricity readily available in rural Wisconsin. His simple, non-rotating AC welder was smaller, lighter, and less expensive than DC units available at the time.

In 1935, Miller Electric invented the world's first high-frequency stabilized AC industrial welder. We continue to innovate equipment to further strengthen our position as a world leader in the welding industry.

As Miller looks to the future and continues to take innovative steps to manufacture the best products, the company recognizes that the greatest "Power of Blue" is not in the products but in the talented people.

The Power of Blue®

Scholarships

Miller Electric Mfg. LLC Scholarships

<https://www.aws.org/foundation/page/miller-electric-mfg-co-scholarship>

Miller is dedicated to providing innovative business-building solutions and ideas, which are driven by the company's unique customer-intense focus.

The partnership between Miller Electric and AWS provides financial assistance to those individuals interested in pursuing a career in welding engineering technology, or welding engineering.

Instructor Resources

The Instructor web page is a useful tool for instructors to find information and resources for the classroom and the lab. Use this site to find welding training related articles, welding resources for the classroom, sign up for the Instructor e-newsletter, and find recommended equipment and filler metals.

Enhances OpenBook experience for classroom review.

OpenBook™ an easy tool to assign and deliver welding content.

Miller

Welcome

OpenBook™ is a software application or Web-based technology used to plan, implement, and assess learning processes. OpenBook™ provides welding educators with an easy tool to assign and deliver welding content, create quizzes, download welding labs, monitor student participation, assess and report student progress and performance.

[SIGN IN OR CREATE ACCOUNT](#)

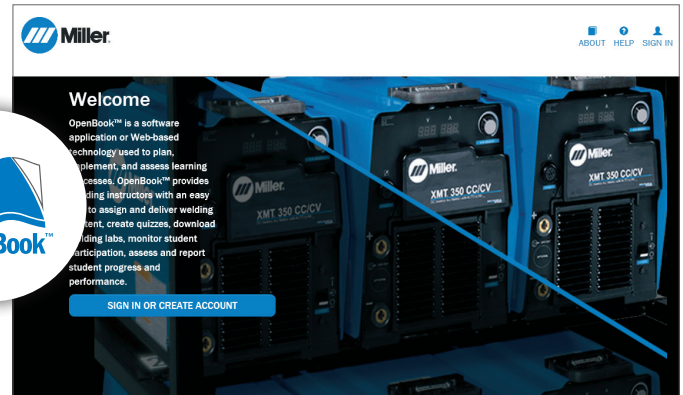

Miller OpenBook™

OpenBook™ is a FREE software application or web-based technology used to plan, implement, and assess learning processes. OpenBook provides welding instructors with an easy tool to assign and deliver welding content, create quizzes, download welding labs, monitor student participation, assess and report student progress and performance. OpenBook welding assignments can be utilized with Miller Training Solutions like AugmentedArc™ and LiveArc™.

FREE TEACHING MATERIAL

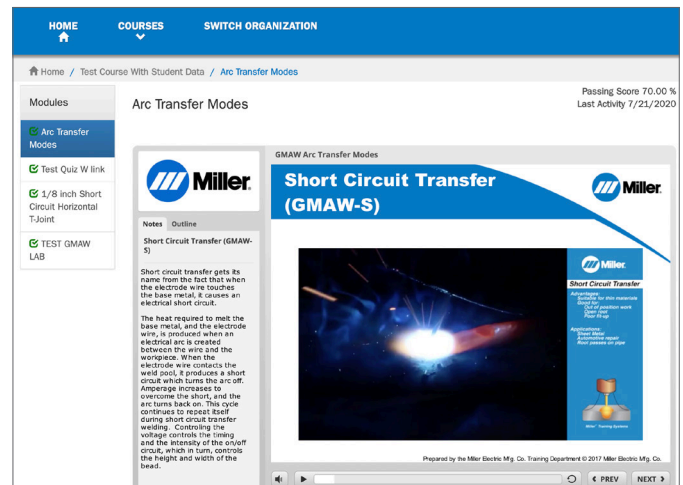

Ideal for high school and post-secondary welding programs

(Aligns with Miller Books available for FREE on iTunes)

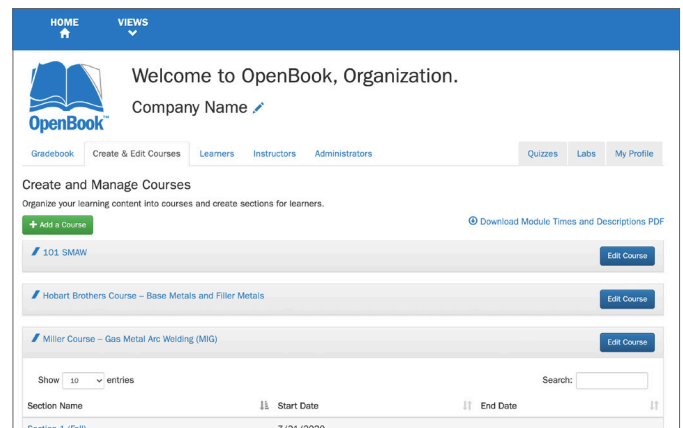

Customize Your Classroom

- Implement materials that fit your curriculum and learning objectives, including:
 - e-Learning modules
 - Weld lab activities
 - Compatible with Miller AugmentedArc®
 - Course builder
 - Quiz builder
 - Lab builder
 - Custom certificate of completion
- Track individual student progress
- All material aligns with AWS standards

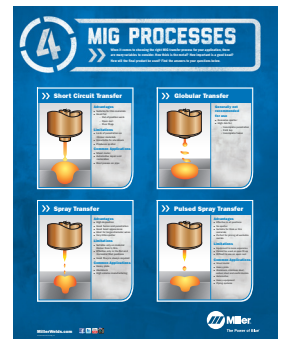

Motivate & Engage Students

- Interactive, stimulating learning includes videos and activities
- Quick, digestible segments
- Mobile friendly
 - Easy to access homework from anywhere
 - Students can check grades and status
- Certificate of achievement awarded from Miller and Hobart for pre-curated courses.

Classroom Training Solutions

AugmentedArc™ Augmented Reality Welding System

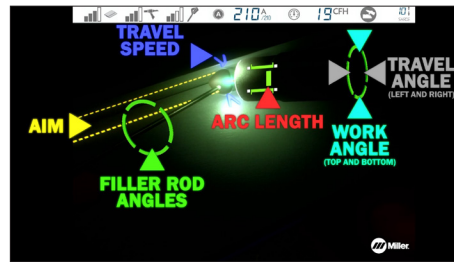

The industry's most realistic welding simulation system

The AugmentedArc system improves the efficiency and economy of classroom education with augmented reality technology that's ideal for beginner and intermediate-level students. Users wear a specially designed helmet that shows them images of the real world, augmented with computer-generated images of metal workpieces, weld arcs and weld beads. The result is a simulation that closely resembles live-arc welding — without using an actual arc or consuming wire, shielding gas or coupons.

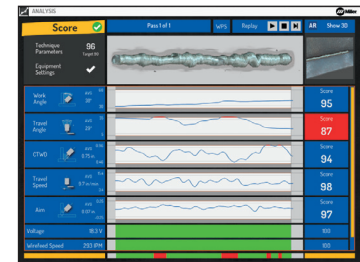

AugmentedArc display

- Helmet's external optical sensor captures and sends images of coded devices and workpieces to AugmentedArc simulator
- Simulator generates three-dimensional images of metal workpieces, augmenting them into a real-world environment
- Display on simulator replicates the view inside helmet to give real-time feedback

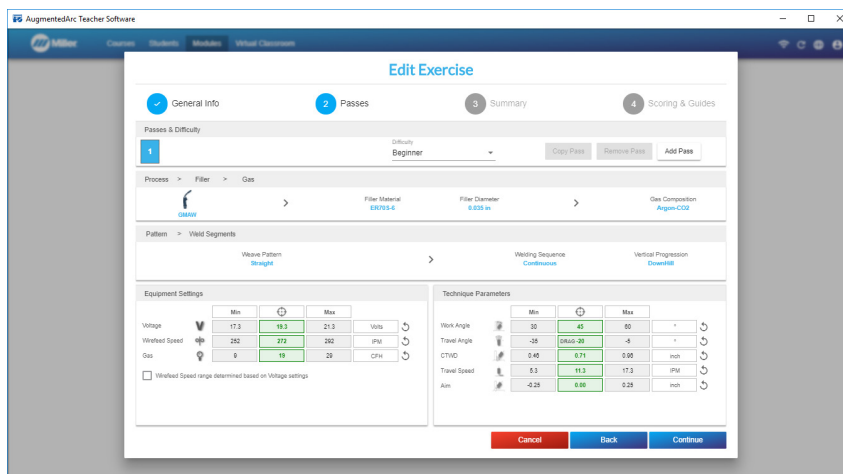

Welding simulation screen

- Visual graphical aids guide the user to achieve target parameters
- Adherence to pre-determined or custom welding parameters is monitored, with confirmation when maintained or alerts when exceeded
- Realistic arc sounds from inside helmet speakers accompany the visuals for a truly immersive experience

Post-weld feedback screen

- User's performance is scored, graphed and recorded for playback
- Performance feedback on various parameters is provided
- Video is stored and available for replay for student and instructor review via teacher software

FREE Teacher Software (no fees for upgrades)

- Teacher software is a user-friendly and flexible learning management system (LMS) that allows instructors to manage courses, content and students, and maximizes the usefulness of AugmentedArc welding simulators.
- Create and manage your own welding curriculum
 - Create quizzes, theory and welding simulation exercises
 - Use pre-developed exercises or fully customize your own exercise parameters, technique and scoring criteria
 - Offline mode allows you to manage the content from anywhere
- Manage student progress
 - Review the complete history and detailed results of student activities
 - View real-time results of welding simulations
 - View statistics and download reports for individual students or entire

Weld Lab Training Solutions

LiveArc™ Welding Performance Management System

The industry's most complete live arc welding training system

Ideal for lab training, the Miller LiveArc welding performance management system provides both a simulation/pre-weld setup mode as well as a live-arc training mode, allowing the user to gain experience and build techniques in pre-weld exercises before seamlessly transitioning into real welding on GMAW, FCAW and SMAW processes.

Motion Tracking Technology

Measures the operator's adherence to pre-set technique parameters using advanced motion-tracking technology. Cameras track the movement of LEDs embedded in the MIG SmartGun and SMAW SmartStinger; the system then delivers visual feedback on the operator's performance via the LiveArc system's main display.

Assignment selection screen

- Guides the user through a range of targeted exercises
- Includes a library of assignments designed by Miller and the flexibility to configure customized assignments
- Offers assignment completion status, history summary and easy access to detailed performance history data

Welding procedure specification (WPS) screen

- Guides the user through proper selection and preparation of materials
- Provides correct power source and wire feeder settings
- Provides target values and limits for various parameters
- Assignment parameters can be configured to suit the skill level (and scoring potential) of the user
- Displays instructor-determined target score and assignment completion criteria

Post-weld feedback screen

- Data is provided following tests in both simulation and live-arc modes
- Performance feedback on various parameters is provided
- All test data is stored and allows for monitoring and evaluation

Weld Lab Product Offerings

► **Education Discount Program:** Educational pricing for Welding and Safety Equipment and Filler Metals. Call your local distributor for special pricing

Welding and Cutting Solutions

Miller offers a wide variety of “easy-to-use” solutions for learners to the most skilled welder. Multiprocess systems have become a key solution for many education and training institutions across the country. Miller offers a complete line of multiprocess solutions for MIG, Stick, and TIG processes like the Multimatic® 220, 255 and Dynasty® 280 multiprocess.

Multiprocess Welding Solutions for
GMAW, FCAW, SMAW, and GTAW

Miller recommends

Innovation

Focused on optimizing quality, ease-of-use and cost

Collaboration

Partnering to meet customer needs

Trusted source

Deep product and application expertise to deliver success

Visit **HobartBrothers.com** for more information.

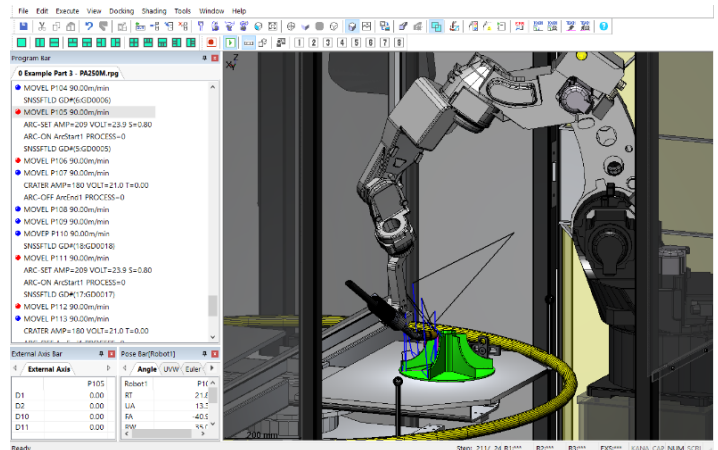

More than just filler metal... SOLUTIONS for your business.

Welding Automation and Safety Products

PerformArc™ 250M

Miller PerformArc 250M. All-in-one, small footprint, palletized, robotic welding training system. With manual 60" turn-table, 250 lb. capacity per side. Learn robot programming & welding (CV & Pulse), two station system operation, how to balance weld time with load/unload, system safety. All on a real world industrial robotic system.

Offline Programming Software DTPS

Miller Offline Programming Software (DTPS). Program and learn robotic welding from a PC. Using a virtual CAD replica of the PA250M create programs that test students on program syntax and correct weld procedures (travel angle, work angle, stickout ect.). Watch a simulated run through of created programs, with the ability to run them on the real world system.
