

MobileArc™

Augmented Reality Welding System

Quick Specs

Process
MIG (GMAW)

Material Type
Steel

Joints
T-joint
Butt joint
Lap joint

Net Weight
7 lb. (3.2 kg)
(complete system with travel bag)

An affordable, easy to use welding simulation tool designed to attract, engage and introduce students to welding through a hands-on augmented reality experience.

Attracting and proficiently training students on a limited budget in welding can be challenging. MobileArc offers innovative training that simulates live welding at an affordable price so students of all ages can get a feel for welding, improve their skills and make informed career decisions. Designed with ease of use and portability in mind, MobileArc allows students to learn independently, accelerating the overall learning process.

Comes complete with:

- Mobile device with case
- Black Classic helmet with mobile device mount
- MIG welding gun with AR nozzle
- Mobile device gun mount
- Workpiece (configurable base plate and top plate)
- 1.50 magnifying lens
- 2.00 magnifying lens
- Mobile device charger
- Travel bag

Highly portable, lightweight design allows for easy transport for remote learning and recruiting events.

Easy setup and simple user interface allows for students to work independently, helping to increase instructor efficiency.

Real-time feedback is provided on users' technique to help correct errors. Reinforce proper welding practices and accelerate skill advancement prior to actual live arc welding in a lab.

Reduce overall training time compared to traditional methods with the realistic welding simulation of the MobileArc.

Minimize material cost by saving wire, gas and workpieces in this simulation environment, allowing students to define their welding skills before beginning live arc welding.

Specially designed helmet mount provides a fully engaging welding experience.

Welding gun mount allows the mobile device to be mounted to the welding gun to promote further student interaction, allowing them to share the welding experience.

The output can be streamed to an external display for a more collaborative learning environment.

System is warranted for one year, parts and labor.

Augmented Reality Displays

MobileArc™ display

- Mobile device camera captures images of the welding gun and workpiece
- Simulator generates three-dimensional images of metal workpieces, augmenting them into a real-world environment

Welding simulation screen

- Visual graphical aids guide the user to achieve target parameters
- Adherence to welding parameters is monitored, with confirmation when maintained or alerts when exceeded
- Realistic arc sounds from the systems speakers accompany the visuals for a truly immersive experience

Post-weld feedback screen

- User's performance is scored, graphed and recorded for playback
- Performance feedback on various parameters is provided
- Recent scores are stored and available for instructor review

Specifications (Subject to change without notice.)

Battery Life	Processes	Welding Positions	Joints	Net Weight
Mobile Device (internal rechargeable battery) 3 hours of continuous simulation (will run indefinitely when powered through USB charging port) Welding Gun (9-volt battery) 70 hours of continuous use	GMAW	2F, 1G	T-joint, butt joint, lap joint	System 7 lb. (3.2 kg) Welding Helmet with Mobile Device 25 oz. (709 g)

Replacement Components

Magnifying Lenses

212238 1.50 magnification

212240 2.00 magnification

4.25 x 2 x 5/23 inch lens enhances view, making it easier to see.

Travel Bag 228028

Allows for easy transport of the MobileArc system. Over twenty separate pockets. Opening of 12 x 18.5 inches (305 x 470 mm).

Black Classic Helmet Assembly 277734

Trusted entry-level helmet for use with the MobileArc system.

Ratchet-Style Headgear 770246

Enhanced support for all-day comfort.

Fabric Headband 770249

Comfort Cushion 216336

MIG Welding Gun with AR Nozzle 286590

Mobile Device Gun Mount 290462

Workpieces 288774

Includes base plate and top plate. Can be configured for t-joint, butt joint and lap joint.
